

Complete the timing simulation below for nodes B, C, and D in the circuit above using the timing parameters T_{PNOT} =3 ns and T_{PAND} =5 ns. Include annotations for the time of each transition, as is done on signal A. There is room at the bottom for additional nodes if desired.

	0	[5	1	0	1	5	2	2()		2	5		3	80	3	35		2	10		4	5		50
A	- !		5		_	 15	Ĺ			20)								-		1	.0				
B				 		 										-									-	-
